INTRODUCTION - ABIToken

Utility Token of Adult Industry

Introduction of Adult Business

The Adult Segment is a growing and evolving industry.

The Adult segment is a multi 100 MRD USD business worldwide with a lot of payment transactions for online and physical products.

Adult content production really took off in the 1980s, when VHS tapes appeared. Later the adult movies and contents were available on DVD or Blu-Ray formats. After the internet started the adult content was first available in the form of images.

Later TUBE sites came which offered free video content or the webcam sites that streamed live content on a continuous basis.

Later on, full films were replaced by shorter scenes.

As technology developed further, 3D and VR content was added.

It is important to understand the market players to see how the online industry works.

Content producers, Tube sites, Webcam sites.

Content producers provide content to Tube sites, which provide a steady stream of advertising space to webcam sites.

ABIToken is a niche tool for the industry.

It can be used to buy/pay for Adult Online/Offline products and it provides various benefits and discounts to its owner in a secure environment.

MISSION / VISION

Our mission/vision for ABIToken is to introduce a secure, globally recognised token to the adult industry that everyone is happy to use and hold and gets discounts/benefits for using it
